

Omni-II

Whip Mix Jewelry Investment
The casters choice

FOR CASTING OF PRECIOUS ALLOYS INCLUDING SILVER, HIGH KARAT WHITE & YELLOW GOLD

- Smooth accurate castings
- Consistent results
- Dedicated technical support team
- Accredited to ISO 9001
- Worldwide network of distributors

Omni-II has recently been developed to offer casters a medium priced investment powder but still offer the technical advantages and experience of the Whip Mix chemists.

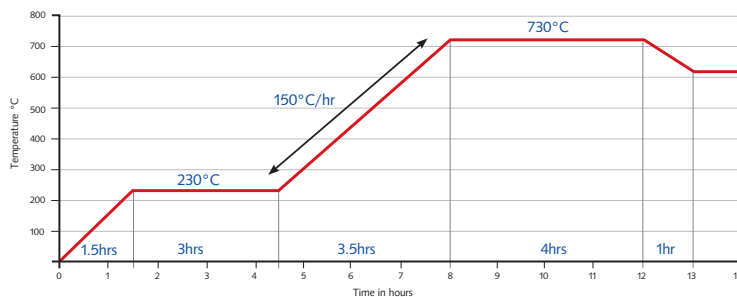

Omni-II will cast all precious alloys including Silver, Yellow Gold and White Gold (except Palladium White Gold for which Omnicast is required). It cleans off the casting easily leaving a smooth surface finish therefore reducing polishing time.
